We recommend the following high performance lubricants.

Molytec Silicone Lubricant is a hi-performance, translucent paste, which is non-toxic, and has an operating range of -50° to +200° C. Silicone Lubricant has very good water repellency, is oxidation resistant and has good adherence to dry surfaces. It is resistant to tracking and demonstrates very low volatility.

This is an ideal assembly and operating lubricant for all oil resistant seals and O-Rings.

Magnalube-G Teflon Based Grease is one of the best operating lubricants available in the marketplace.

It constantly deposits a Teflon film on the contact surface surfaces which continually lubricates and protects against corrosion and wear. Magnalube-G is water resistant and will not migrate from hot surfaces. It is serviceable under load conditions to 7000 psi and is both mechanically and chemically stable. Operating range is from -40° to +290° C.
