WHO ARE AB SEALS?

Have You Ever Wanted A Supplier That Spoke Your Language?

We believe that you need the **Right Product, At The Right Time, For The Right Price.** With a stock holding of over 55,000 parts and nationwide access to all major manufacturers and importers, we are able to facilitate a solution to all your sealing issues.

Non Standard Product?

As part of the Seal Team Group, we have access to seal maker machines that can manufacture seals anywhere from 0mm to over 1m in diameter.

Historical Sales History - For Easy Ordering.

Our electronic sales database has been in operation since 1995. This means we can instantly refer to your sales history for prompt service.

About This Guide

This guide has been supplied to assist you in identifying common hydraulic seals & wipers. It lists out both imperial and metric seals in size order. Profiles are provided as a reference to assist in the correct matching of your seal to our part number.

Additional sizes available upon request.

Profile designs and colours provided in this guide are indicative of final product.
Refer the AB Seals sales team with any enquiries.

Right Product / Right Time / Right Price™

The **AB Seals Product Listing Catalogue** is a comprehensive listing of our standard product lines.

Each section highlights a range of product and is separated into imperial and metric sizes. Sizes are listed by their primary measurement i.e. internal diameter for rod application and outside diameter for piston application and are listed from smallest to largest for ease of reference.

Whilst this is a comprehensive list of product it is possible that not all available size & style combinations are listed.

Using a range of processes including CNC lathes and water/laser jet cutting we are able to provide custom made designs to best suit your operating conditions.

Please contact our helpful sales staff with any enquiries

We have intentionally left some extra blank sections at the back of the catalogue blank, this allows for expansion on literature for other product ranges catered to your specific business needs.

O-RING COMPOUND LIST

AB Seals is Australia's premier supplier of high quality O-Rings.

We stock a huge range of imperial O-Rings to AS568A and BS1806 - in a variety of materials - from American manufacturers. These materials include:-

HYDRAULIC /
PNEUMATIC SEALS

Nitrile 70 Duro (N7)

Best combination of oil resistance and physical properties for hydraulics, cold water applications

Nitrile 90 Duro (N9)

Harder than N7, better for fittings and high extrusion risk application

O-RINGS

Viton 75 Duro (V7)

FKM. High temperature, wide range (not universal) chemical resistance, fuel, diesel and thinners resistant. Black in colour

WIPERS

Viton 90 Duro (V9)

Harder than V7, better for fittings and high extrusion risk applications.

ROD SEALS

Viton 75 Duro (VB)

FKM. High temperature, wide range (not universal) chemical resistance, fuel, diesel and thinners resistant. Brown in colour

PISTON SEALS

EPDM 80 Duro (E8)

Ethylene Propylene. Brake fluid resistant, excellent for hot water and steam to 130°C

WEAR RINGS

Neoprene 70 Duro (C7)

Chloroprene. Used with older refrigerants and with Ammonia. Excellent ozone and weather resistance.

ROTARY SEALS

Silicone 70 Duro (S7)

MVQ. Rust colored. Normally food grade. Low tear and abrasion resistance, low tensile strength. Temperature range -59° to + 230° C. Excellent ozone and weather resistance.

MECHANICAL SEALS

Fluorosilicone 70 Duro (F7)

Sky blue in color. Excellent cryogenic properties -73° to +177° C. Requirement for fuel pumps & aviation fuel under many standards

Polyurethane 90 Duro (P9)

Excellent wear resistance and tensile strength, low flexibility. Often used in porta-power, high pressure applications or as gland cap O-Rings.

Additional information available upon request.

ROTARY SEALS

MECHANICAL SEALS

HNBR (HN7)

Hydrogenated Nitrile. Used in R134A refrigerant. Can be used in hydraulic systems to 150° C

Solid PTFE (TF)

Poor elastic properties but almost universal chemical compatibility. Temperature range from -200° to +260° C. Used where friction is a concern.

'Teflon' Encapsulated (FEP)

These have a Viton or Silicone core captured in a fluorinated Ethylene Propylene copolymer. This reduces the flexibility, but due to the low permeability of the coating, increases chemical resistance. The coating also greatly reduces the slip-stick friction of the O-Ring.

Aflas® 75 Duro (AF)

Excellent chemical compatibility and temperature range - 4° to +232° C

Kalrez®/Perfluoroelastomer

A separate class of compounds of varying properties which may include: resistance to explosive decompression, chemical resistance and temperature resistance to 305° C. O-Rings in this class need to be specially quoted to ensure the correct compound is supplied for the application.

All these O-Rings are of the highest quality. Cheaper O-Rings are available in bulk for light duty and water applications, and are supplied under a different part code sequence

We also carry metric O-Rings to suit German DIN and Japanese Industrial Standard (JIS B2401). These are available in N7 and V7 as standard. Some sizes may be available in N9 and S7, particularly in the JIS Range.

Backup Rings are available for BS range O-Rings in Contoured Rubber (Parbak)(BU), Teflon (BU-T), or Hytrel (BU-H). Depending on size, Hytrel (MBU-H) and Teflon (MBU-T) are available for JIS sizes.

- 20g adhesive, knife, cutting guide

A great investment for a mobile operation.

Each kit contains lengths of quality Nitrile (NBR) o-ring cord, a knife and a bottle of adhesive bond.

Measure the length of o-ring you require, put the cord into the cutting block to make a clean cut and then bond the ends of the cord together.

In no time at all you will have a custom made o-ring to fix your job.

Not suitable for o-rings in dynamic applications.

Grab'n'Go Handipak Stands

AB Seals are proud to offer Point-Of-Sale stands featuring blister packs of the most common fitting O-Rings and seals.

We supply the complete stand, with signs, hooks and 2 complete sets of blister packed parts as listed below. All packs are available separately to restock, with an easy to use reorder form.

Parts include

O-Rings to suit

- BSP -02, -04, -06, -08, -12, -16, -20, -24, -32
- SAE-J518C flanges -08, -12, -16, -20, -24, -32, -40
- UNO -07, -09, -12, -14, -17, -21, -26, -30
- ORFS -09, -11, -13, -16, -19, -23, -32

Flaretite Seals to suit

- JIC-07, -09, -12, -14, -17, -21, -26, -30

Bonded Washers to suit

- BSP -02, -04, -06, -08, -10, -12, -14, -16, -20, -24

Retaining Rings to suit

- BSP -02, -04, -06, 08, -12, -16, -20, -24

- Cat flanges $\frac{3}{4}$ ", 1", 1 $\frac{1}{4}$ ", 1 $\frac{1}{2}$ ", 1 $\frac{3}{4}$ ", 2", 2 $\frac{1}{4}$ ", 2 $\frac{1}{2}$ "

All packs are labeled with the pack part number, the fitting type, dash number and fractional size, and qty contained. Stand can also be supplied with customized blister pack labels showing your address and a contact phone number. Please specify on ordering if you wish to take this option.

This entire unit is available for just \$ 567.84 + GST (CODE 1)
(Part number complete POS-FITTING STAND)

AB Seals is also sells individual blister packs from the stand for use at your sales counter.

The initial range includes seals and O-Rings for common hydraulic fittings as detailed below. All parts are labeled with the pack part number, fitting type, dash number and fractional size, and quantity contained.

The blisterpacks are suitable for use with our mesh stands or any standard mesh slat wall or loop hooks.

The initial range consists of 66 products as detailed overleaf, which include

- O-Rings for BSP, UNO, SAE, ORFS
- Flaretite seals for JIC
- Cat D-Rings
- BSP Retaining rings
- BSP Bonded washers
- Plumbing O-Rings and washers

Grab'n'Go Handipaks are a great way to save time and effort on counter sales - simply identify the fitting size and type and direct the customer to the correct Handipak conveniently located in you sales area.

Blisterpacks come as standard as shown above but can be supplied with customized labels showing your logo and contact number. Total packs must be ordered in multiples of 30 (ie30, 60, 90 of any combination of packs) to allow for printing of custom labels.

We recommend the following high performance lubricants.

Molytec Silicone Lubricant is a hi-performance, translucent paste, which is non-toxic, and has an operating range of -50° to +200° C. Silicone Lubricant has very good water repellency, is oxidation resistant and has good adherence to dry surfaces. It is resistant to tracking and demonstrates very low volatility.

This is an ideal assembly and operating lubricant for all oil resistant seals and O-Rings.

Magnalube-G Teflon Based Grease is one of the best operating lubricants available in the marketplace.

It constantly deposits a Teflon film on the contact surface surfaces which continually lubricates and protects against corrosion and wear. Magnalube-G is water resistant and will not migrate from hot surfaces. It is serviceable under load conditions to 7000 psi and is both mechanically and chemically stable. Operating range is from -40° to +290° C.

FLARETITE SEALS FOR 37° FLARE FITTINGS

Flared fittings have been in use since the 1930's, and have traditionally provided a cost and space effective range of fittings which have become a world standard. Modern hydraulic systems with higher pressures and more arduous duty cycles have exposed the weakness of the metal to metal face seal of the traditional flare fitting, making it difficult to obtain permanent leak free joints. Organizations such as ISO and NFPA recommend "compliant seals" to be added to these fittings to address environmental and OH&S concerns.

Flaretite is a stainless steel stamping featuring numerous concentric ridges. The stamping is then coated with a baked on Loctite™ coating. When placed on a flared fitting the concentric ridges form multiple seals on the face of the flare, while the Loctite™ coating fills minor imperfections and blemishes. The sealing rings prevent environmental contamination and aggressive cleaning solvents from attacking the seal face and also protect the face from fretting, galling, over tightening and electrolysis. As Flaretite is a coated metal seal it is not subject to hardening, weathering or aging like an elastomer seal, providing clear benefits over ORFS fittings. Flaretite requires no modifications and simply clips onto the nipple end of the flare fitting.

This product has been independently tested by Aeroquip to over 1,000,000 square wave high pressure cycles on badly scored fittings and have provided positive leak free sealing.

To extend the life of damaged or new fittings or to meet stringent zero leak tolerance environmental and safety regulations – Flaretite is the only real choice!

We are proud distributors of Snake It protective hose wrap.

Snake It is manufactured from a high density, medium molecular weight polyethylene, giving it light weight, superb abrasion and crush resistance, and - combined with its spiral coil design – the ability to wrap either single hoses or bundles of varying diameter.

The spiral design of true brand Snake It means that it will conform and sit tight to hoses / bundles even when coiled or bent around corners, and its rounded edges mean there is no chance of cutting the hose itself even when flexed.

Snake It is available in a variety of sizes to suit most applications as listed below and in colors such as red, blue, yellow and black. FRAS (Flame Retardant Anti-Static) is also available on request and is fully compliant with ISO6805 for use in coal mines and the oil and gas industries.

Snake It is available in the standard box quantities listed below.
